

Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., often known as TMHU, have been the top selling lift truck dealer in the United States. This company has been headquartered out of Irvine, California for well over 40 years, providing a comprehensive line of quality lift trucks. With a great reputation of durability and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to constant improvement, and its environmental systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift trucks emit 70% fewer smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The head of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's achievement comes from its dedication to produce high quality lift vehicles while providing exceptional customer support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's largest lift truck supplier and is amongst the magazines celebrated World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding company ideology towards environmental stewardship within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other organizations and unquestionably no other materials handling manufacturer can thus far rival Toyota. Environmental responsibility is a key aspect of company decision making at Toyota and they are proud to be the first and only maker to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

Toyota first introduced the 8-Series line of lift vehicles in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission standards, and California's more environmentally friendly emission standards. The end invention is a lift truck that creates 70% less smog forming emissions than the present Federal standards tolerate.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its dedication to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's network of sellers to non-profit organizations and local customers to help sustain communities all over the U.S.

Toyota's lift trucks offer improved stability, visibility, efficiency, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps limit the risk of incidents and accidental injuries, and increasing productivity levels while minimizing the potential for product and equipment damage.

System Active Stability senses various elements that could lead to lateral volatility and potential lateral overturn. When any of those conditions are detected, SAS instantly engages the Swing Lock Cylinder to steady the rear axle. This adjusts the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding durability.

The SAS systems were initially utilized on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped boost Toyota into the lead for industry safety standards. Now, SAS is utilized on almost every new internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with required worker education, overturn fatalities across all brands have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's rigid values continue far beyond the technology itself. The company believes in offering widespread Operator Safety Training courses to help customers satisfy and exceed OSHA standard 1910.178. Training courses, video lessons and assorted resources, covering a broad scope of subjects-from personal safety, to OSHA rules, to surface and load situations, are accessible through the supplier network.

Toyota has maintained a continuous existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are manufactured in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres.

Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The new NCC was built to serve TMHU buyers and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a training center.

The NCC embodies Toyota's dedication to providing top-notch client service. TMHU's 68 certified Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all over the U.S, present the most comprehensive and inclusive client service and support in the industry. The company's new and Certified Used lift vehicles, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure total consumer satisfaction.
