

JLG Forklift Parts

JLG Forklift Part - After retiring in the late 1960's, John L. Grove set out on a cross country RV expedition. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

All through their trip, John reacquainted himself with past business associates along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could swiftly and safely elevate people in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they created and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing models.

JLG lift trucks have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into different marketplaces worldwide and develops new products to make sure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
